## CONTACT

2629, ground floor  
3rd cross, 18th Main, Indiranagar  
Bangalore - 560 078, India

**E-mail:** [bn\\_kamlesh@yahoo.com](mailto:bn_kamlesh@yahoo.com)

**Website:** <https://kamleshwar.com>

## ABOUT

A technology enthusiast and hobbyist developer. I particularly love web development and have been dabbling with Go, Python and PHP for work and personal projects. I've also developed a liking for creating well defined, semantic UIs for web applications.

## WORK EXPERIENCE

### **BookMyShow.com, Bangalore**

**April 2018 — Present**

Manager.Engineering

Engineering manager and full stack developer working on BookMyShow's event management platform, core backend. Work includes building Go micro services, creating HTML5+Javascript+CSS frontends using libraries like React etc. Apart from developing, now also responsible for mentoring team leads, defining technical implementations for projects and helping teams in general.

### **BookMyShow.com, Bangalore**

**Sept 2016 — April 2018**

Assistant.Manager Engineering

Team lead and full stack developer working on BookMyShow's event management platform, core backend. Work includes building Go micro services, creating HTML5+Javascript+CSS frontends using libraries like React etc. Apart from developing, now also responsible for mentoring developers, defining technical implementations for projects and helping teams in general.

### **BookMyShow.com, Bangalore**

**April 2015 — Sept 2016**

Senior Software Developer

Full stack developer working on BookMyShow's event management platform and leading the team. Work includes building Golang monoliths and micro services, creating HTML5+Javascript+CSS frontends using libraries like React etc.

### **Lumean, London**

**February 2012 — April 2015**

Web Developer (remote)

Worked on web applications for small and large clients including:

- NHS (National Health Service, UK)
- SAB Miller (world's second largest brewer, UK)
- Vodafone (UK)
- PMI (American Tobacco giant)

Projects for the big clients revolved around developing custom web based Learning Management Systems (LMS) using the standardised SCORM technology. Backend work involved development in PHP, Python, Javascript, and front-end work involved building HTML5 + CSS3 + Javascript UIs. Early projects involved developing e-commerce portals, websites with custom CMS etc.

### **Infosys, Mysore**

**July 2011 — February 2012**

System Engineer

In addition to the company's client projects, developed and deployed a quiz management system complete with automatic user registration with LDAP integration,

user management, rank lists, quiz creation and publishing for inter-department training within Infosys.

## **Infosys, Mysore**

**February 2011 — June 2011**

Intern

The Internship involved a research project on RDBMS for generating recommendations for creating indices on specific columns of a table based on queries or table thresholds. The system, with an SQL parser written in Java, was built on top of MySQL 5.5, and produced a significant improvement in the database engine's performance. Also developed and deployed 2 editions of the company's Intranet Magazine, Gurukul.

## **iDesignEco LLC, USA**

**July 2009 — January 2011**

Junior Web Developer (remote)

Part-time gig (while in college) that involved building custom WordPress based themes and websites for clients.

## **Oddpath Inc, USA**

**May 2007 — November 2008**

Data Admin (remote)

Part-time gig (while in college) that involved curating and moderating business listings on the American local search engine, Oddpath.

### **PERSONAL PROJECTS**

#### **Flaav**

Flaav is a personal project built on Python(Flask, CherryPy) and MongoDB. It's a media planning web app, capable of recommending semi-intelligent campaigns at media agencies based on advertising requirements.

site: [flaav.com](http://flaav.com)

### **EDUCATION**

#### **B.Tech Computer Science**

**July 2007 — June 2011**

Amrita Vishwa Vidhyapeetham, Coimbatore

#### **Higher Secondary**

**June 2005 — May 2007**

Silver Hills HSS , Kerala

### **TECHNICAL**

**Programmed in:** Go, Python, PHP, Javascript

**Frontend:** HTML5, CSS3, JS templating frameworks (ReactJS, CSS grids) etc.

**Recently used DBs:** MySQL, MongoDB, CouchDB, Redis, PostGres

Familiar with dockerising apps and creating minimal containers, and with Adobe Photoshop for designing, templating etc.

### **INTERESTS**

Former Age of Empires (addict) and clan master. Enjoys swimming, playing football, badminton, and of course, coding for leisure.
